SUMMARY

Astrophysicist with a specialisation in data analytics. Over 5 years of experience working with scientific software development, machine learning, and computational modelling. Excellent communicator, having presented at multiple international conferences, and a skilled team leader with experience in leading multiple projects. Highly-motivated, team-oriented person with a problem-solving mindset.

EXPERIENCE

10/2022 - present

SCI-AN (FUNDED ENTREPRENEURIAL VENTURE)

Lead Data Analyst

- Led project to create end-to-end text analysis pipeline for event data
- Implemented conventional data science and machine learning techniques
- Led social media marketing and targeted sales campaigns

08/2019- 12/2022

HEIDELBERG UNIVERSITY

Astrophysics PhD Researcher

- Led 2 independent research projects to publication
- Published thesis entitled "Modelling Non-Equilibrium Processes in Cool Stellar Atmospheres" (submitted)
- Incorporated machine learning techniques in tandem with physical modelling
- Secured funding for supervising 3-month student research project
- Presented research at multiple international conferences

EDUCATION

2019 - 2023

HEIDELBERG UNIVERSITY

PhD in Astrophysics

Expected 10/23

2015 - 2019

UNIVERSITY OF EXETER

Integrated Master's Degree in Physics

First-class Honours

LANGUAGES

English - Native

German - Working proficiency

Marathi - Working proficiency

Hindi - Conversational proficiency

SKILLS

- Python, Julia, C, JavaScript, Java
- Software development
- Applied statistics and computational modelling
- Scientific writing (3 peer-reviewed published journal articles)
